

IDENTITY AND ACCESS MANAGEMENT

The global cyber attack scenario points to inability of enterprises to protect and manage authorized access entailing Identity and Access Management (IAM) highly critical for business success. Further, as enterprises embrace new technologies and transform to become a digital enterprise IAM strategies will need a continuous review.

Client Challenges

- 

Rapidly evolving regulatory compliance standards requiring continuous implementation of IAM policy controls
- 

Lack of holistic view of risk across the landscape
- 

Integrated governance and intelligence across identity and access lifecycle processes
- 

Improving customer experience while maintaining security posture
- 

Return on investment on the existing investments and cost optimization with multiple user personas

Infosys Offerings

“We enable our clients to build, operate and evolve their identity lifecycle and governance processes with risk based intelligent authentication and authorization across the digital ecosystem”
